August, 2023

To whom it may concern,

This is to acknowledge that Youssef Badreldin has participated in the Software Engineering Capstone project work between January and May of 2023. With his team of students from Alamein International University and Virginia Tech, Youssef worked on building a smart transportation system. They were able to complete the requirements of the project, and they demonstrated deep understanding of the principles and concepts of software development.

For any inquiries, please contact me at: seyam@vt.edu

Sincerely,

*Mohammed Seyam*

Mohammed Seyam, Ph.D.  
Collegiate Assistant Professor  
Department of Computer Science  
Virginia Tech
